PROJECTS

JobTrack – Job Application Tracker 2026

React, Java, Spring Boot, Spring Security, MySQL, JWT

- Built a full-stack job application tracker with secure registration and login using JWT authentication and BCrypt password hashing.
- Developed REST APIs and a responsive React dashboard to create, view, update, search, filter, and sort job applications.
- Added application-stage tracking, dashboard summaries, and account-specific data access so users can manage their own applications.

Sleep Pattern & Disorder Classification – ML Portfolio 2025

Python, Scikit-Learn, NumPy, Pandas, Seaborn, Matplotlib

- Developed a machine learning diagnostic system for automatic sleep disorder classification using ensemble learning (Voting & Stacking Classifiers).
- Performed end-to-end EDA: data cleaning, missing-value imputation, outlier removal, and feature engineering on Kaggle dataset.
- Benchmarked Random Forest, KNN, and SVM models; optimized accuracy via cross-validated hyperparameter tuning.
- Visualized feature importance and model performance metrics (Accuracy, Precision, Recall, F1-Score) using Seaborn and Matplotlib.

Developer Portfolio Website – Personal Deployment 2024

HTML5, CSS3, JavaScript, GitHub Pages

- Designed and deployed a personal portfolio showcasing projects, certifications, and technical skills using GitHub Pages.
- Implemented responsive layouts with CSS3 Flexbox, mobile-first design, and lightweight UI animations.
